### DRINK A GLASS OF REAL HOT WATER BEFORE BREAKFAST.

Says we will both look and feel  
clean, sweet and fresh  
and avoid illness.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it is as necessary to attend to internal sanitation of the drainage system of the human body as it is to the drains of the house.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy from cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast, the phosphated hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, biliousness, stomach trouble, rheumatic stiffness; others who have hollow skins, blood disorders and sickly complexions, are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.—Adv.

TO SOLVE PAPER SHORTAGE.

U. S. Department Suggests Use of Hemp Hurd.

Washington, Oct. 17.—Possible relief in the news print paper and other wood pulp paper markets was suggested yesterday by the announcement of the department of agriculture that a satisfactory quality of paper can be manufactured from hemp hurds.

Hemp hurds are the waste stalk fragments left in preparing hemp fibre for the market.

"Investigations," said the department bulletin, "demonstrated that the hurds can be produced chemically to paper stock by the soda process, under practices little different from those employed in the manufacture of wood pulp from poplar wood."

What to Do for Itching Skins

There is usually immediate relief for skins itching, burning and disfigured by eczema, ringworm, or similar tormenting skin-trouble, in a warm bath with resinol soap as a simple application of resinol ointment.

The soothing, healing resinol medication stops itching at once, and soon clears away all trace of eruption, even in severe and stubborn cases, unless the trouble is due to some serious internal disorder.

You need never hesitate to use resinol. It is a doctor's prescription that has been used by other physicians for twenty years in the treatment of skin affections. It contains absolutely nothing that could injure the tenderest skin. Every druggist sells resinol ointment and resinol soap.

Resinol Soap soothes tender skins and helps to make perspiration clear, fresh and velvety, because it contains this resinol prescription.

BELL-ANS

Absolutely Removes Indigestion. One package proves it. 25c at all druggists.
